ABOUT LEVEL 10

TRENDSETTING PERFORMANCE AND DESIGN

With an acclaimed history of award winning design that's steeped in cutting edge performance and unmatched versatility that's spanned more than half a decade - Tt eSPORTS are proud today to take our original concept that we defined as Level 10 another step further. Introducing to the world our latest evolution for gamers - the Level 10M Advanced; a professional gaming mouse that's bound by no limits.

The Level 10 concept delivers jaw dropping versatility, performance and ergonomics that's driven through iconic and intelligent industrial design. Our new Tt eSPORTS Level 10M Advanced builds upon its predecessor's legendary history, and sets the trend once again for these instrumental core foundations - ensuring that gamers have the tools required to stay two steps ahead of the competition. Driven through design, the concept goes beyond what's commonly expected in the computer technology market and allows us to pioneer products that connect with users at a fundamental level.

The success of our Level 10 concept has been extended to computer gaming peripherals, with an inspiration for exterior design that originates from futuristic hardware technology and virtual landscapes, our Level 10 concept serves to appeal and distinguish itself with PC enthusiasts and gamers via its forms of open modular and configurable structuring that offer both additional functionality, as well as unprecedented design and ergonomics.

We've designed and shaped the Level 10M Advanced in tandem with leading eSports players, helping to balance, optimise and fine-tune a gaming mouse that's worthy of the very best.

DESIGN CONCEPT

IMPROVED ERGONOMIC AND AESTHETICS

Driven through attention to detail and feedback by our professional eSports gamers, our Level 10M Advanced includes an additional base plate and grip - making it even more comfortable in the palm of your hand as you game. Ergonomics are vital for when you're gaming for hours on end – we've fine-tuned the curvature on the Level 10 M Advanced to ensure it's the perfect fit for all grip-types.

UNBEATABLE PERFORMANCE

The Level 10 M Advanced comes with high precision sensor that delivers tournament-grade performance. Combined with our Tt eSPORTS gaming software's overdrive mode – offering a stable DPI that doubles the already remarkable 8200 native DPI sensor – resulting in an effective DPI of up to 16000. All of this is kept stable by the Level 10 M Advanced's powerful Turbo Core 32-bit ARM-based MCU chipset.

PREMIUM COMPONENTS

The Level 10 M Advanced places its focus on providing you with groundbreaking functionality – it's all about the important details. We've implemented upgraded OMRON mouse switches for tactile responsive feedback and precision with a 50-million click life expectancy.

CUSTOMIZABLE ILLUMINATION

One of the biggest pieces of feedback that we heard from our gamers was the ability to customize and personalize lighting options. With our Level 10M Advanced we're proud to include a full three zone set of RGB LED lighting, giving you access to define your colors and style with easy customization options through our included Tt eSPORTS gaming software

NEW GENERATION GAMING SOFTWARE FOR IMPROVED CUSTOMISATION

With our newly improved gaming software, we're embedded an array of new lighting effects and color-changing patterns directly into the software – making it easier than ever before to get the look you've always wanted. On top of that, you can also easily program your favorite mouse or keyboard commands and macros directly to each of the 10 buttons.

ARM BASED 32 BIT MICROCONTROLLER

The most powerful microcontroller designed for performance enthusiast Powered by an ARM 32 Bit microcontroller with 64KB flash memory to build a gaming mouse that meets the special performance needs of enthusiast gamers.

POWERFUL 16000 DPI AVAGO 9800 LASER SENSOR

The Level 10 M Advanced laser gaming mouse now offers up to 16000 DPI. The DPI can be fine tuned in increments of 100 DPI at a time. Move with precision with the Level 10 M Advanced, as you can count on it at the crucial moment for that winning click to be accurate. Furthermore, Selectable DPI options can be adjusted on-the-fly by default (400, 800, 1600, 3200) or higher DPI up to 16000 DPI that can be configured via its gaming software. Dedicated on-the-fly DPI adjustment button (5D Button) for unbeatable access when in-game - allowing you to change your sensitivity without compromising your aim. With the powerful AVAGO 9800 laser sensor, it offers a superior tracking across the widest variety of surfaces!

50 MILLION CLICKS

OMRON SWITCHES

The OMRON switches provide a crisp clean click with a life cycle of 50 million clicks. The Level 10 M Advanced gaming mouse plans to compete as long as you do!

AERODYNAMIC ENGINEERED

Level 10 M Advanced's aerodynamically honeycomb designed mouse with breathability to keep your hand cool, allow you to manage the airflow while using the mouse and increase the flexibility of moving. This concept enhances expressively more ventilation as it will help ease sweaty palms throughout intense gameplay, let your hand cool, increasing your comfort and allow you to bring your performance to a new level. The maximum ventilation is ultimately required for keeping gamers cool. Due to the longer gaming time, aerodynamic gives advantage as it could influence your ability to compete over the long period.

ERGONOMIC WITH BASE-PLATE DESIGN

Comfort is crucial during the gameplay! The new Level 10 M Advanced Mouse features a re-designed right side grip for even better ergonomics than what was offered in the multi-award winning M Mouse. Feedback collected from gamers have been included to the Level 10 M Advanced's design by adding the base-plate on the left side of the mice to ensures a top fit for any hand size, letting you play comfortably during extended sessions without any frustration. The Level 10 M Advanced also has a lighter weight compare from the previous Level 10 M mouse for comfort and smooth reach with consistently accurate tracking! The 2D-Steering Axis system allows you to customize the angle & height of the Level 10 M Advanced mouse body!

2D STEERING AXIS MOVEMENT

Level 10 design concept does not reside only in aesthetics and futuristic purity only, but more importantly to enhance user comfort and convenience as well. Level 10 M Advanced Mouse is divided between top and base segments, and in between the mouse is designed with steering function to adjust the height and angle. The 2D dimensional character of the mouse provides for new and highly sufficient axis movements in various directions and makes the mouse fit as many gamers' preferences as possible.

RGB ILLUMINATION

16.8 MILLION COLORS

Add extra mood to all intense gaming session by adding RGB illumination with 16.8 million color options on 3 separate zones. Lighting on these three regions will let the spirit of the battle dragon shine through more brilliantly than ever!

ADVANCED MATTE COATING

We applied advanced materials to each zone on Level 10 M Advanced for improved comfort and durability. This new matte coating is a balance between rigid surfaces and a soft to touch finish that let you play comfortably during extended sessions.

INTELLIGENT COMMAND CENTER

With our new Level 10 M Advanced Mouse software, it provides easy macros configuration, advanced performance and adjustable light options. Gamers can manage the colors with the software to produce the stunning colors via the communication with the microcontroller. Level 10 M Advanced uses 8-bit for each Red, Green and Blue color (total of 24-bit) with 256 shades of red, 256 shades of green, and 256 shades of blue, equals to 16.8 million colors, giving you the millions of possible colors!

ON-BOARD MEMORY

Level 10 M Advanced features a 256K built-in memory allows you to save and recall all your favorite settings at any-time from any PC. Save up to 5 individual profiles, DPI adjustments, lighting configurations and macros all directly onto the mouse.

TEAM TTESPORTS SPIRIT OF A CHAMPION

You need accuracy. Territory needs expansion. Resources are running down, and you are all alone. The teammates are been eliminated, and very few helps left around you. The only faith is rested inside your palm: the Level 10 M Advanced Mouse. It's stunning, it's powerful. The Level 10 M Advanced's force carries your gaming objective from now on and all you need is to calm down or perhaps a little help to shine your path to victory? How about calling in the sniper to take down enemies before dawn? Level 10 M Advanced Mouse comes in to do what it does best: conquer the game with your victorious signatures around it!

MOUSE_SPECIFICATION

Color	Black
Shape	Ergonomic Designed for Right Hand and Left Hand
No. Of Buttons	10
No. Of Macro Keys	50
No. Of Game Profiles	5
USB Cable Length	1.8m
Omron Switches	Rated For 50 Million Clicks
Weight-In Design	No
Graphical UI	Tt eSPORTS Command Center
Gold-Plated USB	Yes
Dimension	130.75 X 87.35 X 40.53 Mm
LED Color	RGB Illumination 16.8 Million Colors
Lighting Effect	Static , Pulse , Spectrum Running
On Board Memory	256K

SENSOR_SPECIFICATION

Sensor Name	Avago 9800
Sensor Type	Laser
DPI	Up To 16000 DPI via Overdrive Mode
Default DPI	400, 800, 1600, 3200
IPS	150
Acceleration	50g
Polling Rate	1000hz, 500hz, 250hz, Or 125hz (1ms, 2ms, 4ms Or 8ms)
